A Bachelor of Informatics Engineering graduate from Universitas Pembangunan Nasional "Veteran" Jawa Timur (2025), with a strong foundation in software development A passionate individual with a strong enthusiasm for technology and innovation, currently exploring full-stack web development. Highly motivated to build a career in Software Engineering, Cyber Security, and Web Development. Proficient in JavaScript, TypeScript, React, API integration, and modern libraries and frameworks. A lifelong learner dedicated to improving skills and finding purpose through continuous growth in the fields of web, mobile, cyber, cloud, and emerging IT technologies.

EXPERIENCE

Formulatrix Laboratory Automation Solutions **Bandung, ID**
Software Engineer, *Internship* **April 2025 – May 2026**

- Mastered C# and .NET Core fundamentals to build scalable back-end services for enterprise-level applications.
- Engineered an integrated booking solution that utilizes Raspberry Pi as an IoT gateway to monitor and display meeting room occupancy in real-time.
- Collaborated on the full development lifecycle, from initial .NET architecture design to final deployment and hardware integration testing.

PT Santai Berkualitas Syberindo (Sanbercode) **Bandung, ID**
Software Developer, *Internship* **October 2025 – April 2026**

- Developed a donation crowdfunding website using Laravel, covering both frontend and backend development to deliver a stable and scalable platform.
- Successfully resolved critical bugs and functional issues, resulting in a smoother user experience and a reduction in user-reported issues.
- Successfully implemented role-based access for administrators, ensuring secure and structured management of system features.

PT Aksamedia Mulia Digital (Aksamedia) **Surabaya, ID**
Frontend Developer, *Contract* **January – March 2024**

- Developed an academic information system consisting of 3 entities including the administrator, teacher, and student using React, Typescript and Chakra UI.
- Analyzed, researched, and integrated several third-party systems or libraries as a solution to increase development time efficiency and system needs.
- Implemented highly scalable and reusable components, layouts, and user interfaces using React TypeScript.

Frontend Developer, *Internship* **August – December 2023**

- Successfully integrated APIs to improve data interaction and seamlessly implemented them into the frontend.
- Effectively identified and fixed bugs on the web platform, contributing to a smoother user experience.
- Actively participated in the development process by implementing new features.

FORMAL EDUCATION

Universitas Pembangunan Nasional "Veteran" Jawa Timur **Surabaya, ID**
Computer Science Major, Department of Computer Science **2021 - 2025**

- Final GPA(IPK): 3.86/4.00
- Completed backend development training using Express.js with TypeScript under the Google Developer Student Club UPN "Veteran" Jawa Timur (2021).
- Final Project: Developed a web-based academic journal search application for faculty members using Semantic Web concepts, leveraging ontology, RDF, and OWL to enable structured knowledge representation and intelligent information retrieval.

INFORMAL EDUCATION

PT Orbit Venture Indonesia (Orbit Future Academy) **Bandung, ID**
AWS re/Start Batch 13, *Student* **Oktober – December 2025**

- Learned core AWS infrastructure components, including compute, storage, networking, and security fundamentals.
- Studied cloud technologies and best practices for deploying, managing, and scaling applications in cloud environments.
- Completed hands-on learning supported by AI-driven training tools to enhance understanding and practical cloud skills.

CodePolitan X Catamyst Batch #1 **Surabaya, ID**
Bootcamp Frontend Web Development, *Student* **August – September 2022**

- Learned and applied modern frontend technologies including HTML, CSS, JavaScript, TypeScript, React, and Next.js.
- Built web applications using React and Next.js, focusing on performance and maintainability.
- Worked collaboratively in a team to build a full-stack web application.
